

DIESEL DPF & TURBO CLEANER

Diesel DPF & Turbo Cleaner has been specifically formulated to be unique in the market, by adopting the most advanced chemical technology available for diesel engines to offer the following benefits:

- Allows for the DPF regeneration to occur at a significantly lower temperature
- Advanced formula survives the combustion chamber and travels through to the DPF
- Cleans and restores DPF performance
- Increases the life of the DPF by removing soot
- Additional turbo cleaning performance
- Removes carbon build up from the exhaust side of the turbo
