

**DIESEL DPF & TURBO CLEANER**

**DTC325**

**PRO AUTO®**

**PRODUCT FEATURES:**

- Allows for the DPF regeneration to occur at a significantly lower temperature
- Advanced formula survives the combustion chamber and travels through to the dpf
- Cleans and restores DPF performance
- Increases the life of the DPF by removing soot
- Additional turbo cleaning performance
- Removes carbon build up from the exhaust side of the turbo

**DESCRIPTION:**

DPF & Turbo Cleaner is designed to clean and regenerate the Diesel Particulate Filter and provide the added benefit of cleaning the exhaust side of the turbo. Excess soot inside the DPF filter, requires a higher temperature and longer/highway drive for the filter to be properly regenerated, which is not always possible. The product will effectively clean the DPF filter, turbo charger and prevent diesel engines from going into limp mode.

**DIRECTIONS FOR USE:**

Add one 325ml bottle of DPF & TURBO CLEANER to partially empty diesel fuel tank and top up with diesel. Use every third tank or 3,000km.

**SPECIFICATIONS:**

Appearance:	Amber liquid
Transparency:	Clear
Density:	0.82 ± 0.02 g/mL

**ORDERING INFORMATION:**

CODE	PACK SIZE	QTY/CARTON
DTC325	325ml	24

**TEST DATA & CLAIMS:**

- Uses the latest fuel-borne catalysts (FBC), studies suggest that FBC's can:
  - Provide a 41.6% decrease in peak soot area occupation
  - Provide a 20.4% reduction in soot emissions at full load
  - Reduces PAHs and high carbon compounds in exhaust particles.
- Improves particle oxidation properties
- Lowers activation energy of soot particles

**WARRANTY:** All statements, information and data presented herein are believed to be accurate and reliable but are not to be taken as a guarantee, expressed or implied, for which seller assumes legal responsibility and they are offered solely for your consideration, investigation, and verification. Statements or suggestions concerning possible use of this product are made without representation or warranty that any such use is free of patent infringement and are not recommendations to infringe on any patent.
